

May 1, 2013 Security Statement

To whom it may concern,

CSMi
101 Tosca Drive Stoughton, MA 02072 USA

Jacadis conducts an annual security evaluation for CSMi. The scope of this evaluation includes an assessment of their Internet delivered application and its supporting infrastructure, a review of their administrative, technical and physical controls in their office and hosting locations.

Through technical assessment, analysis, and expert interviews, Jacadis has found that CSMi utilizes policy, technology, and processes to effectively prevent, detect, and respond to attacks. The selection of a HIPAA compliant hosting provider and consistent system management policy and procedures, enables CSMi to keep data safe, secure, and available only to registered Users in your organization. Examined security efforts consist of people, processes, and technology, functioning together to prevent, detect, and respond to security threats and vulnerabilities as well as to meet the documentation and programmatic requirements of HIPAA and its HITECH amendments.

This statement is subject to change with or without notice based on the dynamic nature of Internet and systems threats, undiscovered weaknesses or vulnerabilities not yet disclosed to the public, or changes in staff or management that adversely affect organization security.

Additional data is available upon request. A non-disclosure agreement must be executed by all interested parties. This report is intended solely for use by the management of CSMi.
